Product Catalog

Celebrating 20 years of excellence as a leading distributor of quality plywood, lumber and hardware products. Established in 1988, we have partnered with some of the most well known and respected suppliers in the industry to provide you with the highest quality and best service available.

In 1997, Georgia Hardwoods took a giant leap into manufacturing by producing high quality raised panel doors, drawer fronts and MDF thermofoil wrapped doors. Increased demand prompted us to include the manufacturing of hardwood mouldings to complement our line of plywood and doors. In 2001, custom made dovetail drawerboxes were also added to our product line to give our customers a more complete ordering experience.

Since then, Georgia Hardwoods has invested millions of dollars in state of the art machinery and facility upgrades which enables us to be more efficient while providing the highest quality products and services. Our product line has grown to include cabinetry accents such as arch mouldings and a complete line of cabinet storage solutions.

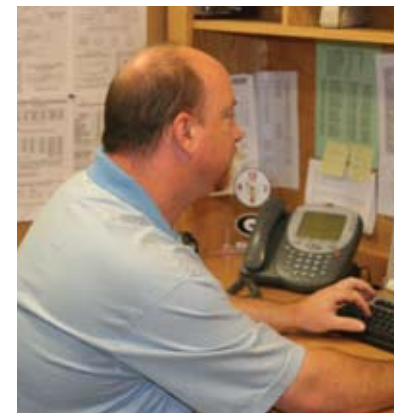

A fully operational spray line system was installed in late 2006 and allows us to apply stain or paint finishes to most of the products we sell.

In October of 2007, we began constructing high end kitchen range hoods, which we have started accepting orders for, available in solid wood or stainless steel.

Georgia Hardwoods has a fleet of trucks from small city vans to full sized tractor trailers as well as a daily common carrier service that enables us to service the entire southeast region and beyond. Our fully stocked showroom is open six days a week and is open to the public.

Located in Buford, Georgia, Georgia Hardwoods is just minutes from the Mall of Georgia. Easily accessible from I-985, just exit at Friendship Road (exit 8 on 985), turn west toward Lake Lanier, go 1 mile to US 23 (Buford Highway), turn left, and travel 1 mile and turn left into Common Wealth Park. Georgia Hardwoods is the first warehouse on the right. Our retail store is located down the first driveway, the last door on the left.

From I-85, exit at US 20 Mall of Georgia exit 115), turn west, past Mall of Georgia and go 4.5 miles to US 23 (Buford Highway), turn right, go 3.5 miles and turn right into Common Wealth Park. Georgia Hardwoods is the first warehouse on the right. Our retail store is located down the first driveway on the right, the last door on the left.

Georgia Hardwoods has a complete finishing department that handles spray and hand applied finishes. Our multistep process begins with the application of stain or paint to the raw wood followed by a sealer. Glaze is then applied, if chosen, and finally a top coat. Glaze can be applied to any of the multitude of colors we offer by flooding or point application. We also have an automated moulding sprayer capable of finishing hundreds of feet per hour. Finishing options are available for most products we sell including veneers, plywood, carvings, rangehoods and posts. Please contact your sales representative for sample chips.

With the increased interest in arched architectural designs of today's cabinetry and trim work, Georgia Hardwoods is pleased to offer you a new line of arched mouldings.

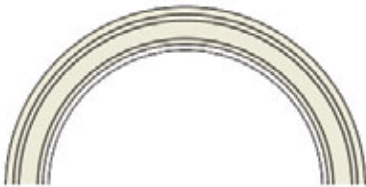

From arched doors and windows to valances, we offer dozens of moulding profiles to fit your custom design applications. Arched mouldings are available in all of our moulding profiles used in flat applications, excluding the bar rail profiles. The same knives from our straight moulding manufacturing process are used in the arch mouldings ensuring a perfect match in every kit.

Arched moulding kits include several arched moulding pieces and 2 straight moulding pieces (approximately 8 ft in length) of the same profile. Kit pricing is based on the wood specie and profile. For most profiles, arched moulding kits can be produced in approximately two weeks. Additional options are available to enhance the arch moulding kit which include keystones, plynth blocks, rosettes and appliques.

Each arch will be machined in as few segments as possible. Each segment is cut and secured to a master template of the size given for the job. The master template containing the segments are machined at the same time to guarantee perfect alignment.

When ordering, please specify the arch type and its inside measurement. For the eye brow arch, a rise measurement will have to be supplied. For all elliptical arches a template must be supplied for accuracy. Please account for the reveal of the window or doorway casing. The arch moulding will be machined to the exact size given. Please see the arch moulding order form for more details at www.gahwd.com/downloads.

Three Types of Arch Mouldings:

TRUE HALF-CIRCLE ARCH

Please include the inside radius measurement plus reveal when ordering.

EYE BROW ARCH

Please include the dimensions for width and center rise measurements plus reveal when ordering.

ELLIPTICAL ARCH

Please provide a template on paper or cardboard when ordering.

Micro FLUSHMOUNT

Drill Bit System

FC-FLUSHDRILL Flushmount Drill Bit

With ball bearing stop collar to control recess depth for the perfect countersunk hole. This bearing system allows the collar to stop spinning when it comes in contact with the wood surface to prevent marring. Also comes in complete punch kit below.

FC-PUNCHKIT

Custom Color Punch Kit

Custom Color Punch Kit includes: Micro FlushMount Drill Bit, 1" X 50' SpeedTape, PowerHead Screws, Punch Tool, 9/16", 11/16", 3/8" dies all in a Hard-Shell Carrying Case

FC-PUNCH

Single Hole Punch

Includes everything in punchkit minus Flushmount drill bit.

FC-SPDTAPE1	1" X 50' Speed Tape
FC-SPDTAPE1.5	1.5" X 50' Speed Tape
FC-SPDTAPE2	2" X 50' Speed Tape

High quality peel and stick on a roll. Used for veneers and laminates, just peel off the liner and stick it.

POWERHEAD screws

#8 Screws with 9/16" head that accepts a #2 square drive bit and type 17 tip. Nibs on the bottom of the head help cut through the material to allow for the perfectly flush finish to the materials surface.

FC-WPWRHEAD112	1.125"	200/PK

Quadro IW 20 Full-Extension Slide

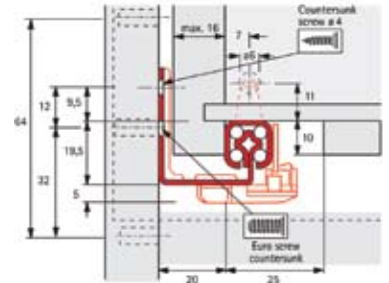

- 100lb Load Capacity
- Self-Close, spring-operated mechanism that acts independently of load
- Slide-on assembly for easy installation
- Resilient tracks with optimal runner action and precision-guided steel ball bearings
- Flexibility when swapping the Quadro partial and Full extension runners without changing cabinet, Drawer or front panel dimensions.

- F-PCB-820MAPLE (32.28")

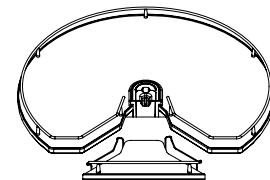

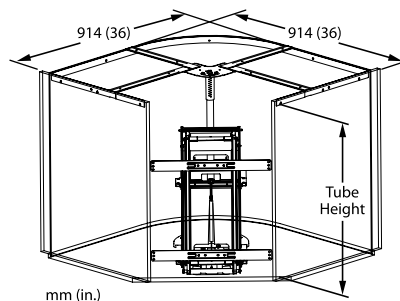

Full Circle Lazy Susan

- F-LS-820MAPLE (32.28")

Lazy Susan Auto Retract

An ingenious solution to the diagonal base corner cabinet. This mechanism pulls the door in when pushed on then with a left or right swing the door revolves inside the cabinet. When the lazy susan reaches the self centered closed detent position, auto retract triggers to return the door to its home position. Please visit our showroom for an installed display of this innovative product. This model is capable of supporting 150 lbs. and requires 3/4" dropped floor to allow for door to revolve inside cabinet. The optional basket kit is the small trays behind autoretract mechanism.

- F-LSC-DOORMECH
