**Design with a doubleshot of color.
Chemetal Tints Collection.**

Design professionals can now bring more color and energy to projects with 15 color choices in Chemetal's Tints Collection.

Recently refreshed with 11 new colors, The Tints Collection offers of-the-moment hues and updated palettes. Adding to this is the vitality, reflectivity, and three-dimensional effects of 11 deeply brushed Chemetal metal designs.

The new Tint colors were created with consideration of today's color preferences, the popularity of the company's past Tints offerings and simply by what looks good on metal, since a deeply brushed aluminum sheet presents an influencing color background of its own.

Custom Tints

Chemetal can also create custom color tints by matching CMYK, RGB or Pantone colors from corporate identity systems, or by matching customer samples.

Options

The Tints Collection is available on the following Chemetal metal designs: 413 Linear, 414 Nomadic, 420 Cascade, 427 Placid, 440 Crescendo, 443 Plume, 501 Noodle Bar, 502 Unagi, 503 Hamachi, 504 Grasshopper, and 505 Butterfly Effect.

Tints are roll-coat applied to minimize VOCs. "Real Red" is an exception; it is spray-coated to ensure the visual transparency of the tinted topcoat.

Specs

Available in 4 x 8 foot and 4 x 10 foot sizes, plus custom sizes, sheets are .025" thick and are ideal for interior usage on vertical and light duty horizontal surfaces. Also available with phenolic backer. Thickness with backer is approximately .05".

LEED

Chemetal Tints contribute to LEED MR Credit 4 Recycled Materials with 85% pre-consumer and Recycled Content, and LEED MR Credit 5.1 Regional Materials for install locations within 500 miles of Easthampton, MA 01027.

About Chemetal

Based in Easthampton, MA, Chemetal is a massive collection of over 100 metal designs, manufactured by Chemetal and sourced the world over. The company's collection includes brushed aluminums, oxidized brass and copper designs, HPL metal laminates, tinted metals, perforated patterns, anodized classic metals and more.
