

Georgia  
Hardwoods Inc

*Designer  
Catalog*

Established in 1988, Georgia Hardwoods has over 20 years of excellence as a leading distributor of quality plywood, lumber and hardware products in the entire southeast. We have a strong partnership with some of the most well known and respected suppliers in the industry which enables us to provide you with the highest quality products and the best service available.

In 1997, Georgia Hardwoods took a giant leap into manufacturing by producing high quality raised panel doors, drawer fronts and MDF thermofoil wrapped doors. Increased demand prompted us to include the manufacturing of hardwood mouldings to complement our line of plywood and doors. In 2001, custom made dovetail drawerboxes were also added to our product line to give our customers a more complete ordering experience.

Since then, Georgia Hardwoods has invested millions of dollars in state of the art machinery and facility upgrades which enables us to be more efficient while providing the highest quality products and services. Our product line has grown to include cabinetry accents such as arch mouldings and a complete line of cabinet storage solutions.

A fully operational spray line system was installed in late 2006 and allows us to apply stain or paint finishes to most of the products we sell.

In October of 2007, we began constructing high end kitchen range hoods in solid wood as well as stocking stainless steel alternatives to suit any style.

Georgia Hardwoods has a fleet of trucks from small city vans to full sized tractor trailers as well as a daily common carrier service that enables us to service the entire southeast region and beyond. Our fully stocked showroom is open six days a week and is open to the public.

Located in Buford, Georgia, Georgia Hardwoods is just minutes from the Mall of Georgia. Easily accessible from I-985, just exit at Friendship Road (exit 8 on 985), turn west toward Lake Lanier, go 1 mile to US 23 (Buford Highway), turn left, and travel 1 mile and turn left into Common Wealth Park. Georgia Hardwoods is the first warehouse on the right. Our retail store is located down the first driveway, the last door on the left.

From I-85, exit at US 20 Mall of Georgia exit 115), turn west, past Mall of Georgia and go 4.5 miles to US 23 (Buford Highway), turn right, go 3.5 miles and turn right into Common Wealth Park. Georgia Hardwoods is the first warehouse on the right. Our retail store is located down the first driveway, the last door on the left.

Wood is a material formed by nature, not man, and must be handled as such. The infinite variety in color, grain and texture is what gives wood its natural character. Because of the differences among varying hardwoods, even within the same species, no two trees are alike. Climate, light, rainfall and minerals in the soil all create diverse and unique grain and color patterns in each piece of wood. These natural variations are not considered defects. We guarantee our doors to be free from defect in material and workmanship for one year from the ship date. Georgia Hardwoods will not be liable for costs related to installation, finishing by the customer or labor to remove and install new products. This warranty does not apply to damages resulting from improper handling, alterations made to our doors, or inappropriate storage. Nor does this warranty cover any product used or installed in connection with our products. Our liability is limited to the net invoice price of the doors only.

Natural wood will expand and contract with climate and temperature conditions. Our doors are built to allow for proper wood movement. We will not be liable for damages due to negligence or improper handling and/or cleaning of our doors. Wood needs protection from temperature fluctuations and humidity. Most problems related to warping, cracking, shrinking and expansion can be eliminated by sealing and top coating wood doors immediately after assembly; therefore, **we will not be liable for problems with doors that have been left unfinished for more than one week after delivery.** Sealing and topcoating wood doors will slow down the moisture absorption from humid conditions, but it will not eliminate it. Therefore, reasonable care is also required after the doors have been finished. **All warranties are voided for any doors, raw or finished, that have been stored or installed in an area without humidity controls.** Georgia Hardwoods will not warranty defects that could have been prevented by the customer, such as improper surface preparation, before finishing. Our doors are sanded to 180 grit and are ready to accept most finishes, however, some specialized finishes may require additional preparation. Application of finish materials implies that you accept the doors as suitable for the finish you have selected. If in doubt, test the finish on one of the doors before finishing the entire job.

We will guarantee for one year against warpage, twisting or swelling for doors that have been given responsible treatment and are within our minimum or maximum sizes.

1. Raised panel doors less than 24" wide and 40" high are warranted against warpage of more than 1/8." Twists are measured after placing the face of the door on a true flat surface.
2. Doors more than 24" wide and/or 40" high are not warranted. Glass doors are not warranted for warpage.
3. Slab Drawer fronts less than 8" high and 24" wide are warranted against warpage of more than 1/8."
4. Slab Drawer fronts more than 8" high and 24" wide are not warranted.
5. We do not recommend the use of slab doors. There is no warranty on slab doors.
6. Any requested variation from our normal construction specs voids all warranties.
7. Due to natural characteristics of each wood door, the textures and grain patterns often remain visible with paint finish and should be accepted as inherent characteristics when selecting painted cabinetry. **Therefore, painted wood doors are NOT warranted against paint cracks in joints or visible glue lines in panels. The textures of hairline cracking of painted finished is a normal characteristic and will not be considered a reason for product replacement.**

Our mitered doors are made with a strong mortise and tenon joint using PUR glue; however, wood will expand and contract in different climate conditions. We have a tolerance of up to .010 on the inside corner to allow for this movement. Mitered doors are not warranted for joint separations caused by high or low humidity.

#### REASONABLE TREATMENT REQUIREMENTS:

1. Doors are not to be stored in freshly plastered or damp work sites.
2. Doors are not to be subjected to excessive moisture, heat, cold, humidity, dryness or direct sunlight.
3. Doors are to be sealed with equal coats of finish on both sides, and all edges within one week from delivery in order to minimize moisture absorption.

Doors should not be subjected to abnormal heat, cold, extreme humid or dry conditions or any sudden changes in temperature or humidity. Wood doors should never be left on a construction site that is open to the elements. Work sites can vary 30-50 degrees from night to day. These conditions will have an adverse affect on both finished and unfinished doors.

#### REPLACEMENT POLICY:

Contact your sales representative within one business week of receiving the defective products. Your representative will arrange to inspect the doors. Any product claimed to be defective workmanship or materials must be returned to Georgia Hardwoods for inspection. Your sales representative will issue a Return Authorization # (RMA#) and will arrange to have the materials returned to us at no charge to you.

1. You will need to supply your sales representative with the original order number and a description of the defect before they will issue an RMA#.
2. Please label the doors with the RMA# and description of the defect. If you wish, we will provide you with a sticker for you to fill out and place on the door.
3. Please circle any defects on the doors with a pencil (or marker for doors that have been finished).
4. Repackage the doors for shipment and notify us when they are ready to be returned.

Once we have received the returned doors, they will be inspected by one of our manufacturing specialists. After the inspection is completed and it is determined that the doors have a manufacturing defect, replacements will be made and shipped out as soon as possible. If the doors are found to be in accordance with our manufacturing standards, you may be billed for the replacement doors. Our intent is to eliminate repetitive problems and defects by actually seeing the defects you may encounter and in some cases re-aligning the quality standards you can expect from us. It is not our intent to penalize you for the problems that defects may cause you, but rather to help us improve our quality by inspecting the defective doors in order to help us diagnose the problem and help to ensure that the problem will not re-occur.

If our doors are damaged in shipping and there is visible crate damage at the time of delivery, no claims will be paid unless the damage was noted on the freight bill. In order to minimize the inconvenience to you, Georgia Hardwoods will do our best to replace any defective products as soon as possible.

Georgia Hardwoods has a complete finishing department that handles spray and hand applied finishes. Our multi-step process begins with the application of stain or paint to the raw wood followed by a sealer. Glaze is then applied, if chosen, and finally a top coat. Glaze can be applied to any of the multitude of colors we offer by flooding or point application. We also have an automated moulding sprayer capable of finishing hundreds of feet per hour. Finishing options are available for most products we sell including veneers, plywood, carvings, rangehoods and posts.

The samples below are some of our most popular finishes and are for general color only. Please contact your sales representative for sample chips in order to see the true color match. Additional finishing colors and options are also available, so please ask your sales representative about our additional finishing options not displayed below.

 Shown with optional sides, applique  
 and corbel blocks. Crown moulding,  
 applique and corbels are not included.

Available in all species  
 1/2" thick solid wood sides  
 1/4" matching plywood bottom  
 Plywood bottom groove 1/2" from bottom  
 Can be assembled or flat packaged  
 Drawer heights between 3 and 11" deep  
 Finished or unfinished

Maple

Pine

Drawer Boxes can be notched to accept undermount slides. Machining fee applies.

Cherry

Red Oak

Six available hand scoop options for internal pullout drawerboxes.

Scoop Option 1  
3" x 1"

Scoop Option 2  
2-1/4" x 1-1/8"

Scoop Option 3  
4-1/8" x 1"

Scoop Option 4  
4" x 1"

Scoop Option 5  
3-3/4" x 1-3/4"

Scoop Option 6  
4-3/4" x 1-3/8"

### Custom Pot Rack Drawer Box

#### GH-DRAWER-POT

Offered in standard 21" depth and 24" height with custom width. Bullnosed upper shelves are rabbetted at 5 degree angle into solid maple sides. Bottom and back panels are 1/2" plywood. 5-7 day lead time, clear coat finishing available.

### Maple Cutlery Drawer Inserts

GH-INSRT-CT15  
15-1/8 X 22 X 2-7/8"  
2-3/8" compartments,  
Can be cut down to 8-3/4" wide.

GH-INSRT-CT20  
20-5/8 X 22 X 2-7/8"  
2-3/8" compartments,  
Can be cut down to 14-5/8" wide.

### Maple Utensil Drawer Inserts

GH-INSRT-UT18  
18-1/2 X 22 X 2-7/8"  
3-1/2" compartments,  
Can be cut down to 8-1/8" wide.

GH-INSRT-UT24  
24 X 22 X 2-7/8"  
3-1/2" compartments,  
Can be cut down to 12-1/8" wide.

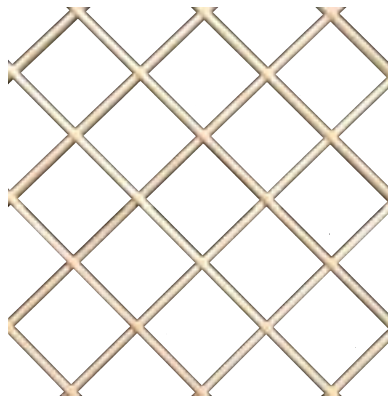

### Spice Rack Drawer Insert

GH-INSRT-SP18 18 X 19-3/4 X 1-1/2"  
GH-INSRT-SP24 24 X 19-3/4 X 1-1/2"

Made from Maple with Clear Coat finish.

### Wine Bottle Lattice

All legs available in Birch, Cherry, Maple and Oak. All are 35-1/4" X 3-1/2" X 3-1/2"

**Carved Valances**

Available in Cherry and Maple.  
All are 6-1/2" X 61" x 1-1/4".

Traditional K-Y6620 (Top)

Acanthus K-Y6643 (Middle)

Vinyard K-Y6624 (Bottom)

**Arch Mouldings**

Arched moulding kits include several arched moulding pieces and 2 straight moulding pieces (approximately 8 ft in length) of the same profile. Kit pricing is based on the wood specie and profile. For most profiles, arched moulding kits can be produced in approximately two weeks. Additional options are available to enhance the arch moulding kit which include keystones, plynth blocks, rosettes and appliques.

Each arch will be machined in as few segments as possible. Each segment is cut and secured to a master template of the size given for the job. The master template containing the segments are machined at the same time to guarantee perfect alignment.

When ordering, please specify the arch type and its inside measurement. For the eye brow arch, a rise measurement will have to be supplied. For all elliptical arches a template must be supplied for accuracy. Please account for the reveal of the window or doorway casing.

**Three Types of Arch Mouldings:**

**TRUE HALF-CIRCLE ARCH**

Please include the inside radius measurement plus reveal when ordering.

**ELLIPTICAL ARCH**

Please provide a template on paper or cardboard when ordering.

**EYE BROW ARCH**

Please include the dimensions for width and center rise measurements plus reveal when ordering.
